

Irrigation Water Master & Schedule

Irrigation water is generally available from April 15 to October 15. Since each and every homeowner wants to receive the maximum pressure out of the irrigation system, the Board is asking that homeowners voluntarily follow the odd/even watering system as follows:

If your address ends in an even number (i.e. 10326 Altair) then you would water on the even days (2nd, 4th, etc.) of the month. If your address ends in an odd number (10233 Capella) you would then water on the odd days (13th, 15th, etc.) of the month.

Don't Forget!

If you are putting in a new lawn, the odd/even water schedule does not apply during the first 30 days. After your lawn has been in for 30 days, we ask that you follow the odd/even watering schedule. For those with new lawns, please be sure that you don't water too much and overflow into your neighbors yard. Check with your sod installer as to the watering schedule you should follow in order to have your sod take root. The time frame will also depend upon the weather at the time you lay your sod.
